The ADM® Ankle Foot Orthosis (AFO)

The central component of the ADM® Modular Brace System is the revolutionary ADM® Ankle Foot Orthosis (ADM® AFO). Every detail has been designed to maximise clinical performance and patient compliance.

C-Pro Direct is confident the ADM® AFO is the best performing, most well tolerated and easy to use Clubfoot orthosis available today.

This advancement has drawn on C-Pro Direct's 20 years Clubfoot experience, input from leading clinicians and support from a major footwear manufacturer.

"I really like that this AFO stabilises the great toe in the position required to promote good foot shape development".

Dr Matthew Dobbs MD, FAVS, FAAOS, FAOA. Director Paley Dobbs Clubfoot Centre, Inventor of the Spring Assisted Articulating Clubfoot Brace

To purchase ADM® Modular System braces or arrange a trial:

Busy clinics will benefit from these accessories to maximise efficiency and patient service

The ADM® Modular Brace System provides bracing options for typical, atypical and complex cases. It is easily deployed and used in a clinical setting.

About C-Pro Direct

C-Pro Direct was established in 2004 by Stella and Philip Morris following the birth of their son Anthony, who had bilateral clubfoot, and their subsequent visit to Iowa to see Professor Ponseti. Since visiting Iowa C-Pro Direct's mission has been to enable every child and family affected by Clubfoot to benefit from the Ponseti Method and good quality bracing. C-Pro Direct has supplied in excess of 500,000 clubfoot braces to almost every country in the world.

C-Pro Direct is a leader in innovation and is responsible for many advancements in clubfoot bracing and support. C-Pro Direct created the Abduction Dorsiflexion Mechanism (ADM®), the ADM® Modular Brace System, Double Layered AFO socks and the Dorsi Ramp (Paediatric Slant Board) and holds numerous international patents.

C-Pro Direct has always been Proud to Support the Ponseti Method and to sponsor patients in need, clinical research, training and development. In 2006 the company produced a British Medical Association (BMA) award winning Ponseti Method parent information video.

About Dr Dobbs, MD, FACS

Matthew Dobbs, MD, FACS is director of the Dobbs Clubfoot Center at the Paley Institute in West Palm Beach, Florida and was the founder (2001) and director of the clubfoot clinic at Saint Louis Children's from 2001-2020. Dr. Dobbs trained under the guidance of Professor Ignacio Ponseti (Ponseti Method). Since that time, he has introduced the Ponseti Method for clubfoot management to surgeons in more than 50 countries. Patients travel to see Dr. Dobbs from all 50 states and from more than 100 countries over six continents (North and South America, Europe, Asia, Africa, and Australia).

Dr Dobbs developed a casting methodology for the treatment of vertical talus, which has become the internationally recognised "gold standard" for this condition. He is also the inventor of the Dobbs™ range of Braces which includes fixed and articulating braces for Clubfoot and Vertical Talus. Dr Dobbs has collaborated with C-Pro Direct for many years and together they have established the Dobbs™ ADM® brand, which is applied to all ADM® Modular Braces System Bars and Clips.

c-prodirect
Proud to Support the Ponseti Method

C-Pro Direct is an ISO 13485 Accredited Medical Device Manufacturer

C-Pro Direct won a Red Dot Design Award for the ADM® Modular Brace System

C-Pro Direct is registered with European, US and UK regulatory bodies. Other international registrations have been made by our distributors
